

SHARVEE SHROTRIYA

Senior Business Analyst | Analytics, Strategy & Growth

Austin, TX · +1-602-394-6392 · sharvi.sharma051@gmail.com · [linkedin.com/in/sharvee-shrotriya](https://www.linkedin.com/in/sharvee-shrotriya) · github.com/sharvee-shrotriya
Authorized to work in the US without sponsorship (H-4 EAD)

7+ years in business intelligence and analytics, building dimensional data models, BI reporting layers, and forecasting systems that executive teams rely on. Owned the full stack at Avnet (Fortune 500) from ETL to dashboard. Building FinNudge, a production fintech app (Plaid, Snowflake, LLM). MBA Finance. M.S. Business Analytics, GPA 3.9.

IMPACT AT A GLANCE

\$3M+ Revenue disruption prevented	40% Reduction in ad-hoc reporting	20+ Global teams served in real time	25% Faster BI delivery via agile
--	---	--	--

CORE SKILLS

Technical	SQL (advanced), Python (pandas, NumPy), Power BI, Tableau, Snowflake, Azure, Databricks, dbt, ETL/ELT, SAP, Supabase/Postgres, Plaid API
AI & Methods	LLM-assisted analytics, AI agent prototyping (OpenAI, Anthropic APIs), RAG, A/B testing, forecasting, regression, statistical modeling
Delivery	Agile/Scrum, Jira, stakeholder management, executive presentations, cross-functional partnership, KPI design & governance

EXPERIENCE

Founder & Builder · FinNudge (Personal Finance Analytics Platform)

2025 – Present

Austin, TX | finnudge.money

- **Built and shipped a production fintech analytics platform from 0 to 1** on a Postgres/Supabase data layer with 100+ schema migrations, row-level security, and performance-tuned indexes handling multi-institution transaction data.
- **Built a multi-source ETL pipeline via Plaid API** normalizing bank transaction data into a unified schema, then engineered an LLM-assisted categorization engine (OpenAI API) combining rule-based logic and merchant-cache with full audit trails.
- **Developed time-series analytics dashboards** in Streamlit surfacing net-worth trends, cash-flow analysis, and recurring-transaction detection with confidence scoring and next-due date prediction.

Staff Business Analyst · Avnet Inc. (Fortune 500 Electronics Distribution)

Jul 2022 – Jun 2025

Phoenix, AZ | \$27B revenue | Promoted from Business Analyst

- **Reduced reporting lag from multiple days to under 4 hours** by consolidating 6 ERP sources into a Snowflake data warehouse with Databricks-powered star-schema models and a Power BI semantic layer, enabling self-serve forecasting for 20+ global teams.
- **Prevented \$3M+ in revenue loss** by building a root-cause analysis pipeline in SQL and Python that surfaced a demand planning blind spot weeks before it hit the P&L — findings adopted as standard risk reporting.
- **Cut ad-hoc data requests by 40%** by designing a self-serve Power BI reporting layer — DAX calculated measures, row-level security, and automated refresh — tracking sales velocity, win rates, conversion, and churn across all business units.
- **Shaped executive QBR decisions and quarterly targets** by building Python A/B test frameworks and scenario models in Tableau and Power BI, directly referenced by VP leadership for resource allocation.
- **Improved BI release velocity 25%** by building reusable dbt staging/mart models with lineage and tests, introducing Jira-based agile delivery, and establishing dimensional modeling standards across the team.

Research Associate · Banasthali Vidyapith University

Jun 2016 – Apr 2020

India | National financial-literacy programme with major Indian banks

- **Drove 30%+ uplift in digital payment adoption** by leading behavioral segmentation and cohort analysis across 1,000+ participants, identifying root causes, and redesigning outreach strategy.
- **Saved INR 5M in program costs** by building an end-to-end KPI framework and Excel-based executive dashboards that secured renewed grant funding and recognition in 2 research publications.

Senior Relationship Manager · ICICI Securities Ltd.

Aug 2014 – Sep 2015

India

- **Delivered 15% portfolio revenue growth, 20% client retention improvement, and 25% product adoption uplift** by designing a client segmentation strategy and developing a cross-sell playbook adopted organization-wide as standard practice.

EDUCATION

M.S. Business Analytics | Arizona State University

GPA 3.9 | 2022

MBA, Finance | Banasthali Vidyapith University, India

GPA 3.4 | 2014

PORTFOLIO — [GITHUB.COM/SHARVEE-SHROTRIYA](https://github.com/sharvee-shrotriya)

- **FinNudge** — production fintech analytics app (Plaid, Supabase, OpenAI API). Live at finnudge.money
- **More projects:** dbt + Snowflake supply-chain models, RAG analytics agent (pgvector + Streamlit), demand forecasting (Prophet + XGBoost).
